

# The ECO4 scheme is here to help you save money and improve your home

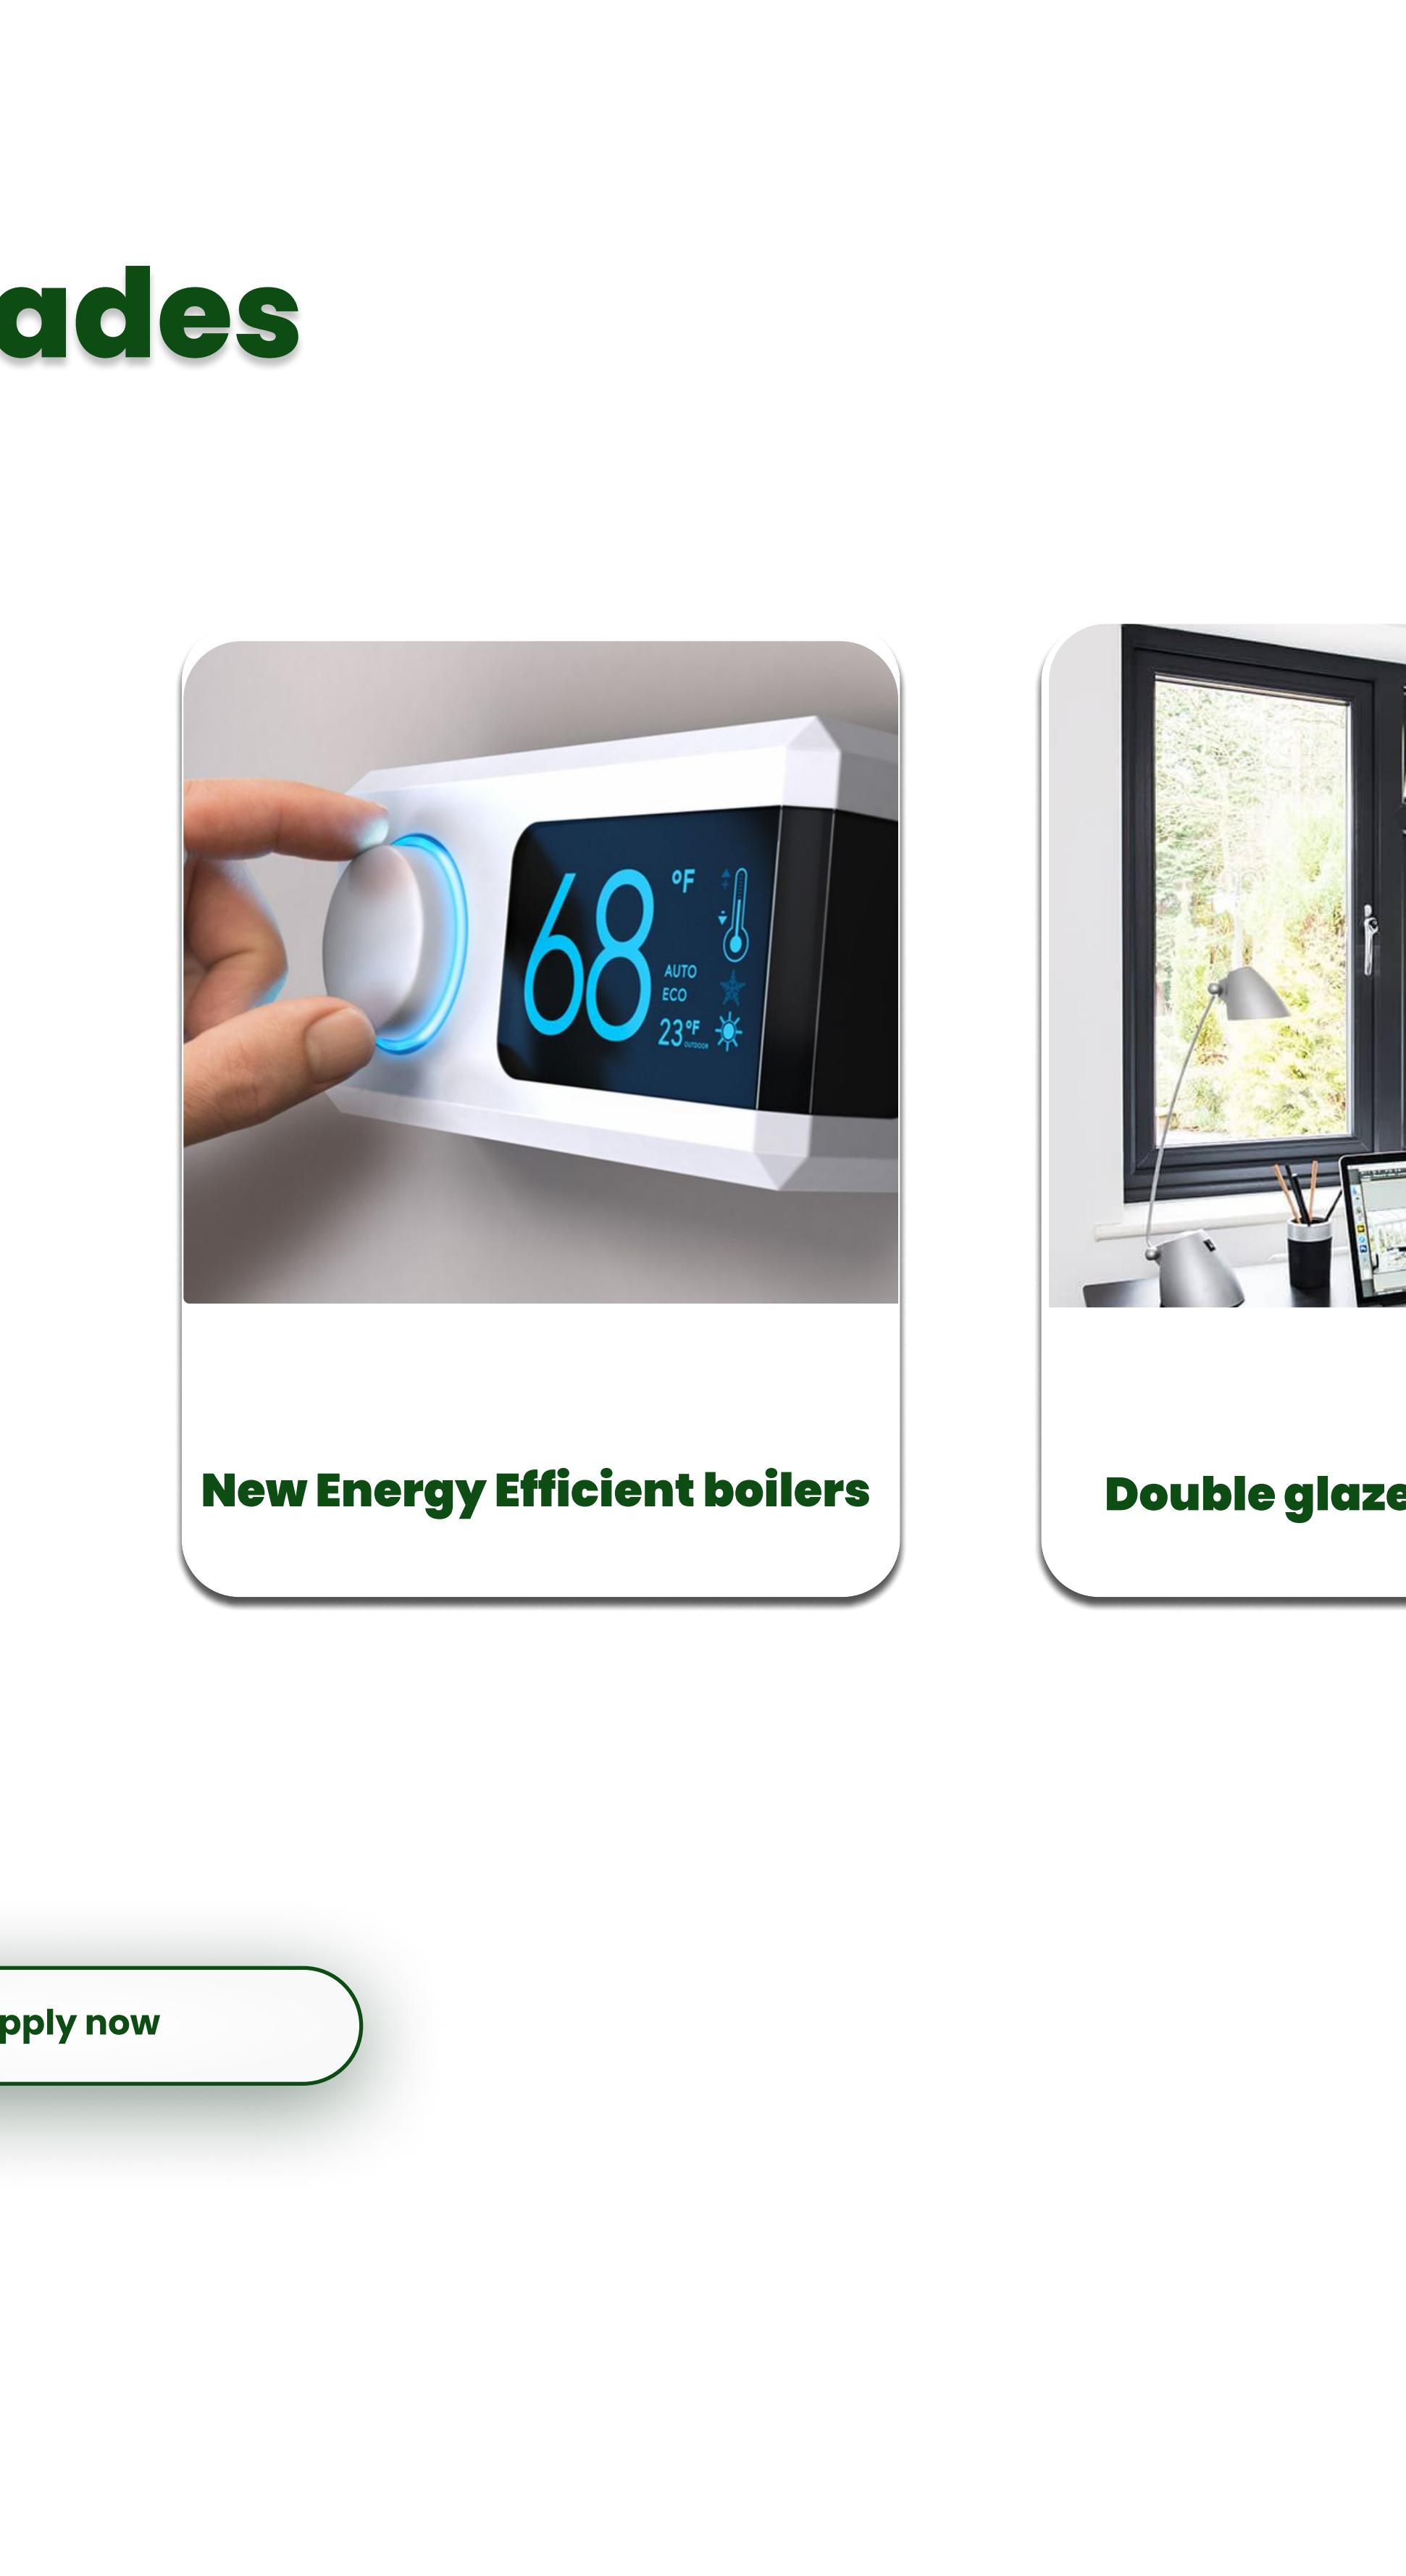

[Check if you are eligible](#)

## About Us

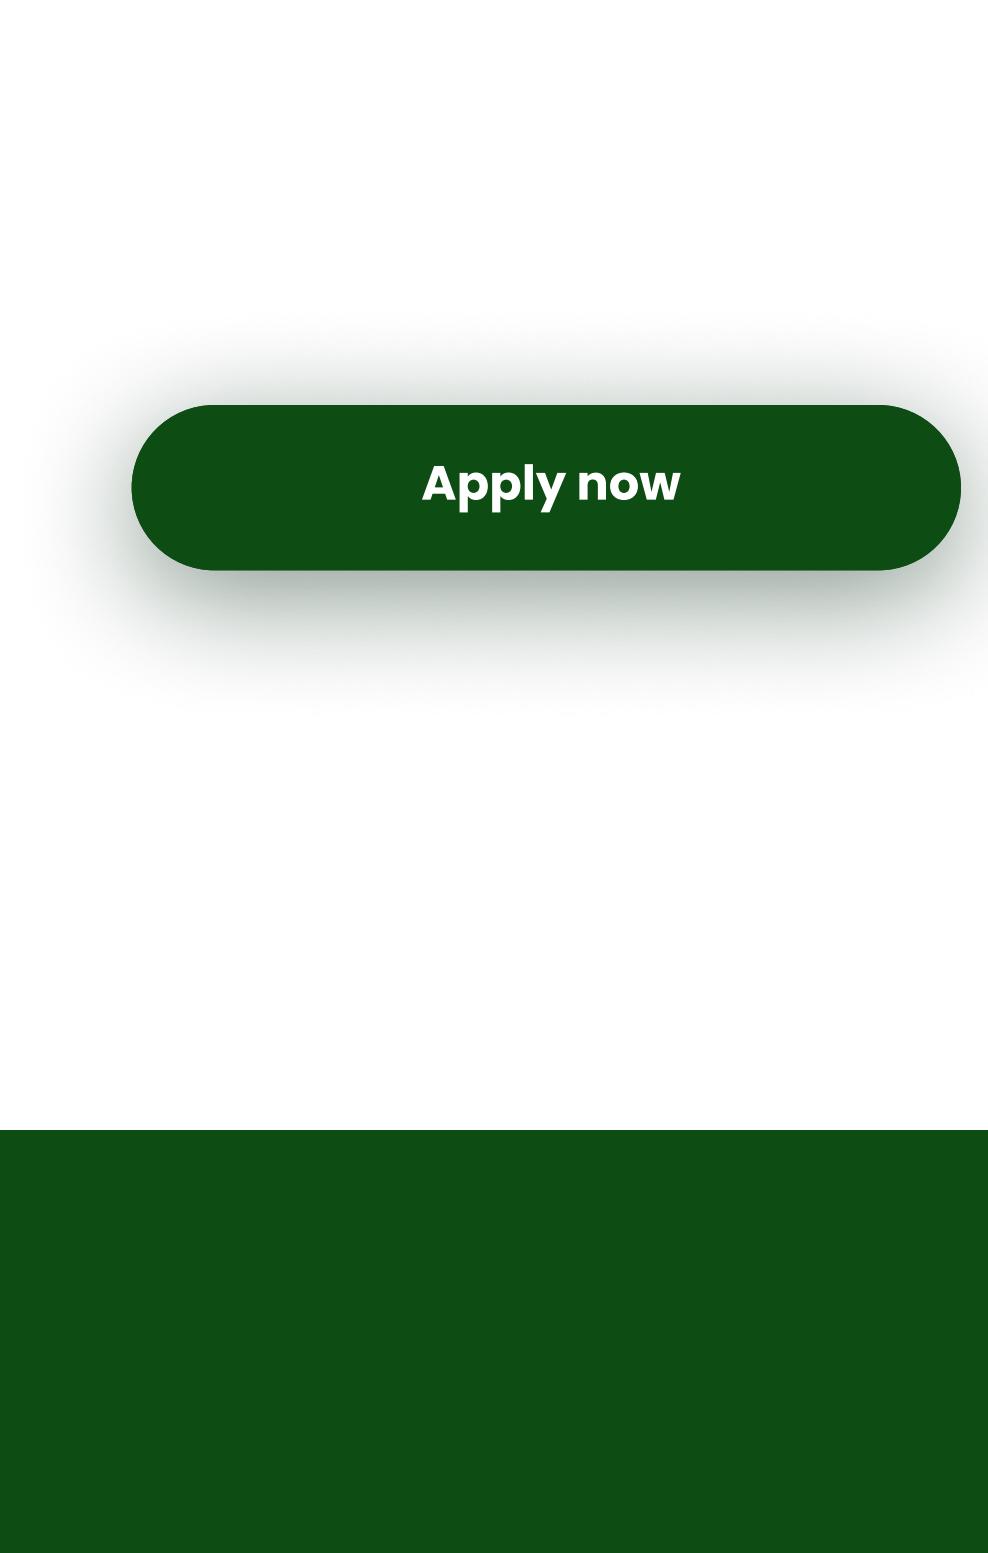

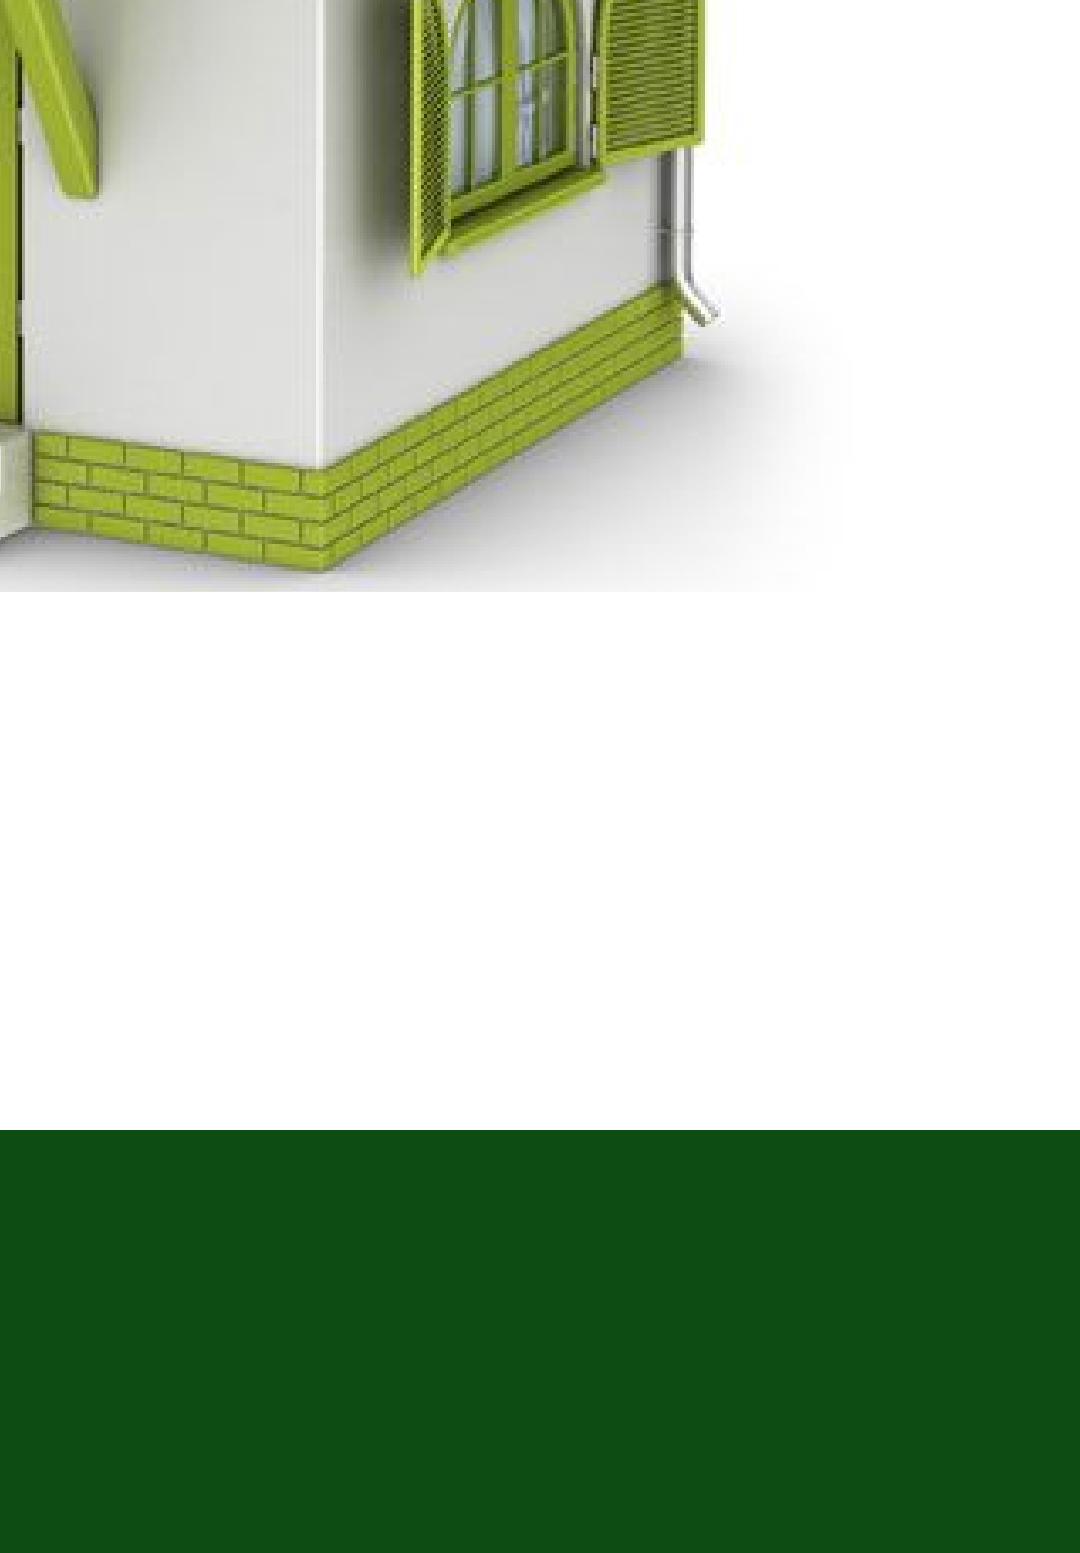

### ECO4 IS A GOVERNMENT BACKED SCHEME .

The main aim of the UK Government ECO4 scheme is to make sure the UK reaches the net zero emission. With our expertise in energy auditing, renewable energy solutions, and carbon management services, we empower organizations to make environmentally conscious choices that benefit their bottom line and the planet.

Our team of experienced professionals is passionate about creating innovative solutions that reduce energy consumption, minimize carbon emissions, and promote long-term sustainability. We understand the unique challenges faced by businesses today and offer tailored strategies to address their specific needs.

**Walls and loft insulation****Solar Panels****New Energy Efficient boilers****Double glazed windows**[Apply now](#)

## Eligibility

Eligible customers living in a home with a low EPC rating will be offered a package of free energy-saving measures and heating improvements. The ECO4 scheme is not a way to only replace or upgrade your boiler.

If you own/rent a property that is heated with electricity and receive income-related benefits you are very likely to qualify for a government grant.

- You are a Homeowner, Landlord or a Private Tenant
- You receive income-related benefits
- You have Electric Storage Heatersboiler.
